DETAILED ACTION

1. This action is in response to the Appeal Brief filed on 09/12/06.

Allowable Subject Matter

2. Claims 1-23 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The art of record does not teach nor does it suggest the specific features called for in the claims, in particular the concept of coloring lung tissue in a CT image and representing the rest of the pixels in gray scale. The examiner previously maintained that Uppaluri discloses this concept; however, the examiner was incorrect. Col. 21, lines 62 – 65 were used to support this argument. On further review though the examiner has realized that the cited lines call for "color-coded borders" and not a fully colored lung. The examiner has been unable to find any other reference that teaches this concept. Finally the examiner would like to state that although the applicant's arguments for patentability, in the appeal brief, focused on coloring based on Hu values, this is not the allowable material. Patents such as 5,370,692 and 5,966,662 disclose the concept of assigning colors based on Hu or CT values.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
